

LINNE S 90

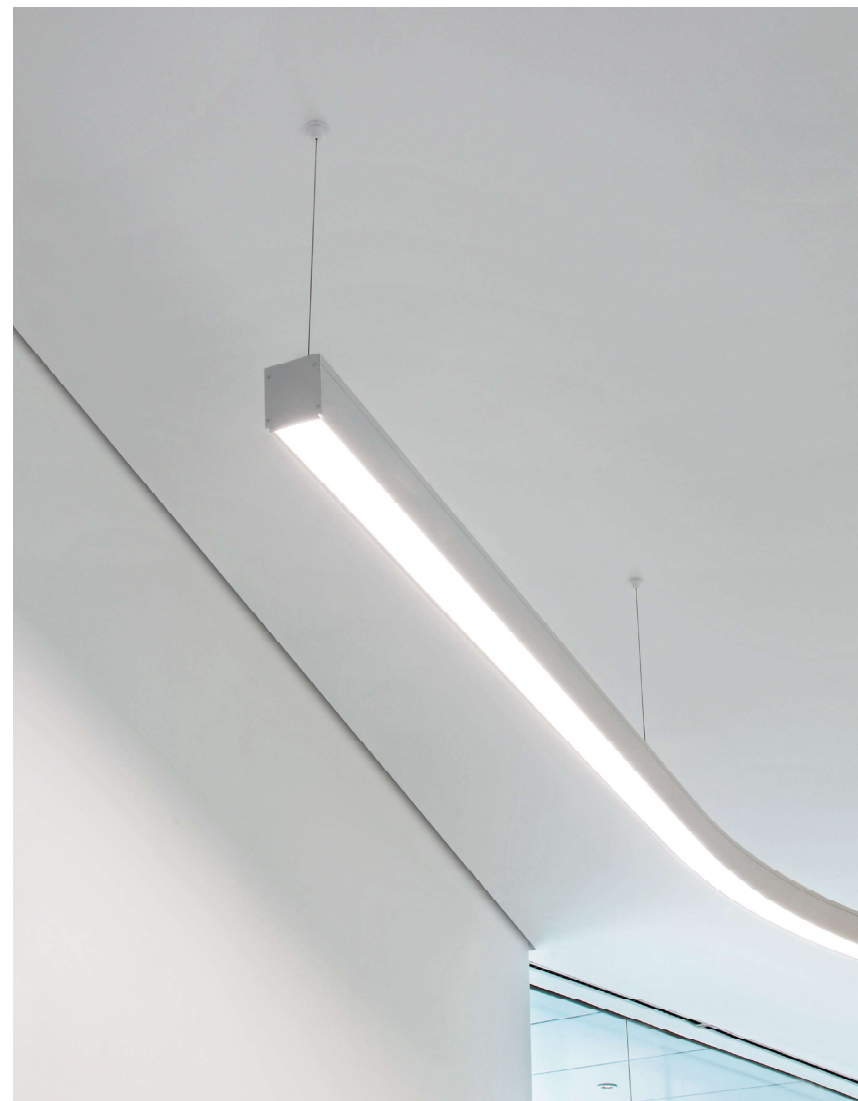

what is it?

versatile lighting for flawless flexibility

Imagine a room: an office, hallway, hotel or shop, which, though used for a range of purposes, benefits from complete uniformity in its lighting. Where a single device is able to satisfy any need faced...

Can you picture it?

Now Euluce by Lightenjin can meet any and all needs thanks to the versatility of the new Linne S 90 appliance range.

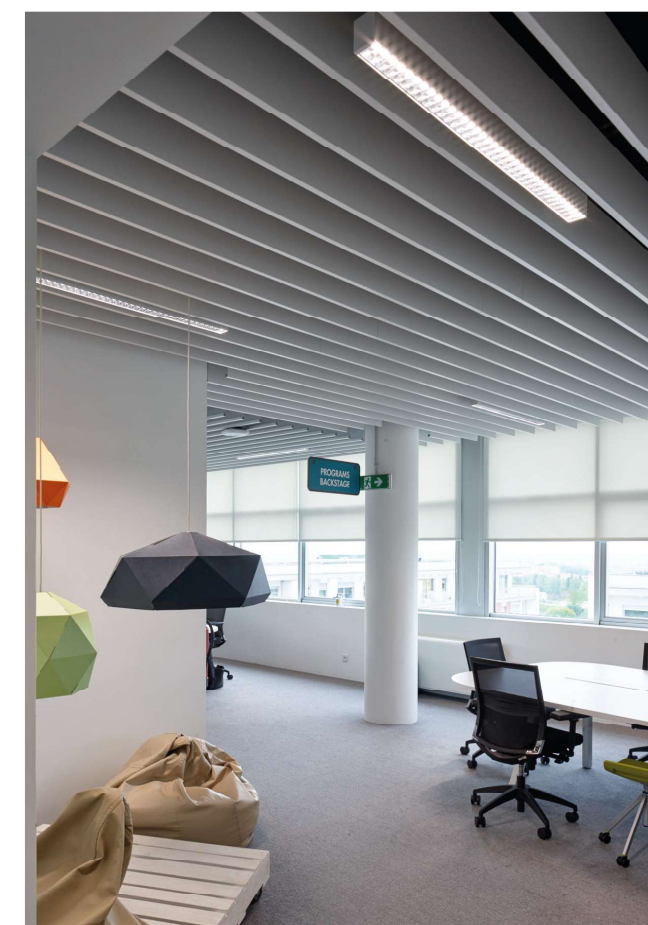

Adapting a range of optic groups that provide wide geometric amplitude, the **Linne S 90** meets almost any need, from lines of light to curved configurations.

The limit is your imagination!

#flexible
#multifunctional
#fluid

advantage!

The Linne S 90 product range stands out for the way in which each of a set of products was developed per the same founding principles, able to provide for a diverse range of optic groups.

optic groups

The unique **LINNE S 90** project arose from the need to increase production capacity and create linear models with organic shapes. Doing so resulted in a highly innovative product being produced for Lightenjin, both in terms of its integration and industrialisation, allowing for the incorporation of a wide range of light engines, diffusers, lenses and reflectors, and the creation of unbroken curved lines.

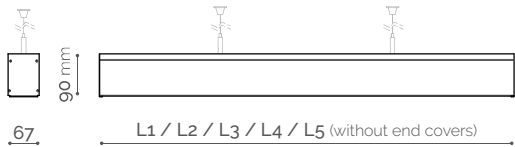

features

The range is available for **surface-mounted** or **suspended application**, providing **direct** or **indirect lighting**.

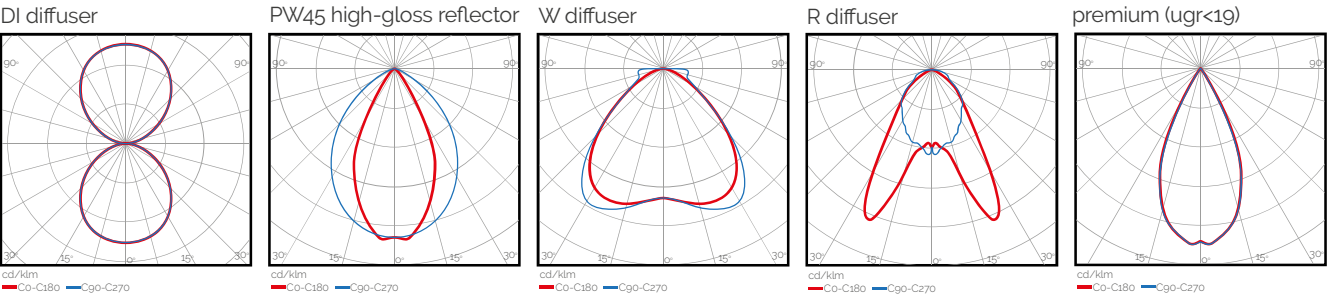

We are available to assist with unique, personalised projects that meet a range of shape and size requirements to ensure adequate lighting levels are provided that focus specifically on light distribution and uniformity.

Linne S 90 DI / S 90 Pris / S 90 O				Linne S 90 PW45		Linne S 90 Premium		Linne S 90 W	
				Linne S 90 R					
Model	L1 (mm)	L2 (mm)	L3 (mm)			Model	L4 (mm)	Model	L5 (mm)
1 × 44	565	563	578			2 × 4	631	-	-
2 × 44	1124	1132	1142			3 × 4	946	-	-
